1. Are these primitive expressions or call expressions?

primitive	call	3
primitive	call	add(2, 3)
primitive	call	print(5)
primitive	call	3 + 4

2. When do we make a new frame in an environment diagram?

3. **Challenge:** Fill in the blanks below so that the output is as follows.

```
>>> def ne(mo):
...     def do(ry):
...         return mo("Just keep "+ ry)
...     return do
>>> def mar(lin):
...     print(lin())
>>> mar(ne(-----)) (-----)
Just keep swimming
```
